# VE-NAVIGATOR FOR GM LITE

With the support of the Singapore Building & Construction Authority (BCA) IES have created groundbreaking software to help you undertake Green Mark assessments quickly and easily.

GM Lite will guide both experienced and novice users through the workflow to perform a robust, repeatable, quality controlled and comprehensive Green Mark® assessment. If you undertake Green Mark calculations you don't want to miss out on the technical, commercial and productivity benefits that this tool will offer you.

## THE BENEFITS THE VE-NAVIGATOR FOR GM LITE PROVIDES:

- A guided step-by-step route to assessing the performance elements of the Green Mark system.
- Enables live updates of simulation results and Green Mark scores at every level of a change, delivering a true iterative process for design improvements.
- Simplifies the assessment process by making decision-making easy at every step of the project, even at the conceptual level.
- Incorporates unique built-in Quality Control functionality.
- Automates and eliminates the time-consuming, redundant steps in the process, for the project team as well as for assessors.
- Ensures no action is missed and allow items to be easily picked up from any point.
- Allows efficient integration of primary modelling tools like Revit® and SketchUp.
- Provides a tool for architects which offers precision with simplicity.
- Facilitates whole design team collaboration.
