

Transferring your license

When transferring licenses from one computer to another. You need to release your key from the old machine

1. On the main screen click Help>>Release Key

2. You will then be greeted with the release keys dialog, here you will find your software pin and your activation code for this license, Please take note of your activation code

3. Click OK and you will receive a message of confirmation once released, none of your application should now be visible in your application menu
4. Now you will need to use the same activation code to activate this license on your new machine

- Load the VE
- Go to Help > Request License Keys
- Complete the form
- Add your activation code
- Select Action: Activate (new license) or Refresh (updating existing license)
- Click Send Request. Once approved your license will now be active

Note: you can only transfer a licence 3 times in a year, it is not intended for IES licences to be regularly shared between machines in this way.
